

GRAPPLIN

Rank order start of the round or when both jokers are face down: 2, 3, 4, 5, 6, 7, 8, 9, 10, J, Q, K, A

Rank order when one joker is face down: A, K, Q, J, 10, 9, 8, 7, 6, 5, 4, 3, 2

Setup: Lay one joker face up in front of each player. Shuffle the remaining cards and deal 18 cards to each player. Put the remaining 16 cards face down on the table to create a draw deck and flip three cards face up so that they form a card row next to the draw deck.

Overview:

- Non-dealer starts the hand. Rotate the dealer each hand.
- First to shed out gets one point. First player to reach three points wins the game.
- Play a combination or bomb with a higher rank than the combination or bomb played by your opponent or pass. If the opponent played a combination, your combination must have the same combination type and length or you can play a bomb. Afterwards, the opponent's turn starts.

Combinations

Single	Pair	Triple
3	33	333
Run of 2	Run of 3	Run of 4
34	345	3456

Bombs

Quad **3333** > Suited Run of 4
♦3 ♦4 ♦5 ♦6

Special Actions: Trigger one special action by matching one of your cards with one rank present in the opponent's combination.

Available special actions:

- Take 1 or 2 cards.
- Add one card to the opponent's combination.
- Remove one card from the opponent's combination.

Then discard the matched card.
Exception: You added the matched card to the opponent's combination to create a pair, triple, or quad. Afterwards, you must beat the opponents attack.

Flip Joker: Turn your face up joker face down to reverse the rank order from 2-Ace to Ace-2. Afterwards, you can optionally perform a special action and you must beat the opponent's attack.

The opponent cannot reverse the order back from Ace-2 to 2-Ace until a player has passed and a new combination or bomb has been led. If both jokers are turned face down, the rank order cannot be changed anymore.
